## Revision History

Name	Date	Reason For Changes	Version
M. Hall	2002.05.30	Based on 6/4/2002 agreements between CDE & CSIS, issues related to significantly modifying ethnicity-based aggregation rules deferred until 2003 (documentation changes only). Based on 5/22 clarification from Cheryl T., extend change to add selection for district-level records ("If INST GN NULL 14.03 8 <sup>th</sup> through 14 <sup>th</sup> digits equal "zeros"). This change now applied to aggregation rules 2.142 through 2.160 (as well as 2.124 through 2.141). The record of changes has been updated and all changes for version 3.3 and 3.4 are included in the external document of changes (CDIF Chngs 20020530.xls) that is distributed with this version of the revised aggregation rules. Please review the revision history for version 3.3 in tandem with this revision history. These rules are now submitted for review as "final."	3.4
M. Hall	2002.05.20	Integrate feedback received from the CSIS team and issue as final version for Fall 2002. For detail concerning all changes, please reference the document distributed with this version of the document (CDIF_Chngs20020520.xls). The changes primarily related to making the format/content more consistent; fixing typos; and adding clarifying logic in the "How Used" columns to match the logic that has actually been implemented.	3.3

# 1. Introduction

## 1.1 Purpose

This **Aggregate File Creation Parameters** is intended to provide a clear set of rules and specifications for creating the CDE required aggregate file County District Information Form (*CDIF*) from records submitted by Local Education Agencies (LEAs). This document is under very strict version control and is to be updated and released simultaneously with new releases of the CSIS Data Dictionary, Code Tables, Validation Tables and File Formats.

This document is created and maintained by California Department of Education, Education Demographics Office.

## 1.2 Document Conventions

The title page and header of this document contain a version number in the form X.Y where:

X is the version number in sequence 1 through N

Y is the revision number in sequence .1 through .N

The first approved version of the document will be numbered 1.0

Each new version represents substantial change to the document (for example, adding or deleting work products or processes) and will be serially numbered to the left of the decimal (for example 2.0, 3.0,...) once it has been approved by CSIS management.

Minor revisions (that is, format or spelling) will retain the major version number and increment the revision number to the right of the decimal (for example 1.0, 1.1, 1.2,...).

## 1.3 Intended Audience and Reading Suggestions

The primary audience intended to read this document are the technical staff responsible for transitioning the CDE paper based aggregate reporting system to the new State Reporting and Records Transfer System (SRRTS). These are the CDE Program technicians and the programming staff writing the aggregation routines. The software quality assurance staff should also use this document to create test plans.

Readers should first familiarize themselves with the SRRTS System Architecture, SRRTS System Requirements Specification, SRRTS State Reporting Subsystem Architecture and Transmission File Formats prior to reading this document. The reader should be thoroughly familiar with the CSIS Data Dictionary and Code before reading this document.
